KOLOSSEUM

III

Der Leitende Designer Jamie Berard und der LEGO® Designer Rok Zgalin Kobe

ANMERKUNGEN DES DESIGNTEAMS

Für den Leitenden Designer Jamie Berard gab es viele gute Gründe für die Wahl des Kolosseums: *Es ist nicht nur historisch bedeutsam und architektonisch relevant, sondern zählt auch zu den Sets, die am häufigsten von unseren Fans gewünscht wurden. Vor allem bietet dieses imposante LEGO® Modell jedoch eine anspruchsvolle Herausforderung und ein tolles Bauerlebnis.*

Bevor Rok Zgalin Kobe LEGO Designer wurde, studierte er Architektur und verdiente sein Geld in diesem Beruf. Die Entwicklung der LEGO Version einer solchen Ikone der Architektur war eines seiner lange gehegten Ziele: *Das Kolosseum stand schon immer ganz oben auf meiner LEGO To-Do-Liste! Ich baute zunächst die kurvigen Außenmauern. Von diesem Zeitpunkt an wurde der Maßstab beibehalten. Wir hatten nie die Absicht, das größte LEGO Modell aller Zeiten zu erschaffen. Doch je mehr wir das Modell perfektionierten, desto mehr Teile waren erforderlich, um die Details darzustellen.*

Im Kolosseum gibt es 3 Arten von Säulen – dorische, ionische und korinthische. Alle drei Säulenarten sind im LEGO® Modell originalgetreu nachgebildet.

GEWALTIGE HÖHE

Bei absolut maßstabsgerechter Bauweise wäre dieses LEGO® Creator Expert Modell eigentlich niedriger. Der Leitende LEGO Designer Rok Zgalin Kobe verwendete die Technik der „Überhöhung“ – die auch häufig bei topografischen Karten Anwendung findet –, um die gewaltige Höhe des Kolosseums besonders zu betonen.

Obwohl das LEGO® Modell höher ist, musste es den Querschnitt des Originalbauwerks immer noch möglichst genau nachbilden, um die ovale Form richtig hinzubekommen. Das galt auch für die zahlreichen Bögen auf den unteren 3 Ebenen.

Zur Darstellung der Schnecken an den ionischen Säulen hat der LEGO® Designer einfach ein vorhandenes LEGO Rollschuhelment umfunktioniert.
