COLISEO

III

Jamie Berard, jefe de diseño, y Rok Zgalin Kobe, diseñador de LEGO®

IMPRESIONES DEL EQUIPO DE DISEÑO

Para Jamie Berard, jefe de diseño, existían numerosas razones de peso para elegir el Coliseo: *Constituye un monumento históricamente significativo y arquitectónicamente relevante; además, es uno de los sets que más nos han pedido. Pero lo más importante es que es un modelo LEGO® sorprendente y estimulante, ¡y construirlo es un reto muy divertido!*

Antes de convertirse en diseñador de LEGO, Rok Zgalin Kobe estudió arquitectura y trabajó en ese campo, por lo que crear una versión LEGO de semejante icono arquitectónico siempre fue uno de sus objetivos: *¡El Coliseo siempre ha estado en lo más alto de mi lista de tareas pendientes en cuanto a LEGO! Empecé construyendo los muros curvos exteriores y establecí la escala a partir de ahí. Nunca nos propusimos crear el modelo LEGO más grande de todos los tiempos, pero, mientras más lo perfeccionábamos, más piezas necesitábamos para representar los detalles.*

El Coliseo tiene 3 tipos de columnas: dóricas, jónicas y corintias. Todas ellas están fielmente interpretadas en el modelo LEGO®.

ESCALA DRAMATIZADA

En realidad, si la escala fuera exacta, este modelo LEGO® Creator Expert sería más bajo. Rok Zgalin Kobe, diseñador sénior de LEGO, usó una técnica denominada *exageración vertical* (empleada con frecuencia en los mapas topográficos) para enfatizar y transmitir la dramática naturaleza vertical del verdadero Coliseo.

Aun siendo más alto, el modelo LEGO® tenía que ajustarse rigurosamente a la sección transversal de la estructura original para recrear correctamente la forma ovalada y los numerosos arcos de los 3 pisos inferiores.

Para recrear el capitel característico del orden jónico, el diseñador de LEGO® usó un elemento LEGO que ya existía: un patín.
