Building a Legend

When Santiago Bernabéu was elected Club President in 1943, he dreamed of building a state-of-the-art stadium with a capacity for 100,000 fans. Critics called his project both overly ambitious and “pharaonic,” but Bernabéu persevered, and after three years of construction, the New Chamartín Stadium was inaugurated in December

of 1947. It was one of the most modern grounds in the world and would go on to bear witness to some of the most brilliant episodes in the history of Real Madrid. In 1955 the club decided to mark the vision of Santiago Bernabéu by renaming the stadium in his honor.

La création d’une légende

Lorsque Santiago Bernabéu est élu président du club en 1943, il rêve de construire un stade ultramoderne pouvant accueillir 100 000 partisans. Ses détracteurs reprochent à son projet d’être trop ambitieux et « pharaonique ». Néanmoins, Bernabéu ne se laisse pas abattre. En décembre 1947, après trois ans de construction, le nouveau stade Chamartín est inauguré.

C’était l’un des terrains les plus modernes du monde, et il allait être le théâtre de certains des chapitres les plus brillants de l’histoire du Real Madrid. En 1955, le club décide de célébrer la vision de Santiago Bernabéu en rebaptisant le stade en son honneur.

La construcción de una leyenda

Cuando se eligió a Santiago Bernabéu como presidente del club en 1943, su sueño era construir un estadio de vanguardia con capacidad para 100.000 fanáticos. Los críticos calificaron su proyecto como “demasiado ambicioso” e incluso “faraónico”, pero Bernabéu perseveró y, luego de tres años de construcción, el Nuevo Estadio de Chamartín se inauguraba en

diciembre de 1947. Se trataba de uno de los campos de juego más modernos del mundo, que llegaría dar fe de algunos de los episodios más brillantes de la historia del Real Madrid. En 1955, el club decidió celebrar la visión de Santiago Bernabéu rebautizando el estadio en su honor.

From the design team

One of the most exciting aspects of this model was exploring the history of the Estadio Santiago Bernabéu. The stadium is full of invisible artifacts of past eras. When you're building the first tier of seating, you're traveling back in time to the stadium in the 1940s. The gallery is an echo of the 1950s and the roof is an artifact of the 1980s and

the World Cup hosted here. Buried throughout the building are the memories of fans, the excitement and tears experienced at matches on this ground for 75 years.

Milan Madge, LEGO® Designer.

Un mot de l'équipe de conception

L'un des aspects les plus passionnants de ce modèle a été d'explorer l'histoire de l'Estadio Santiago Bernabéu. Le stade regorge d'artefacts invisibles des époques passées. Lorsque vous construisez le premier niveau de sièges, vous remontez le temps jusqu'au stade des années 1940. La tribune est un écho des années 1950 et

le toit est un artefact des années 1980 et de la Coupe du monde de football organisée ici. Enfouis dans le bâtiment sont les souvenirs des partisans, l'exaltation ressentie et les larmes versées lors des matchs ayant eu lieu sur ce terrain depuis 75 ans.

Milan Madge, concepteur LEGO®.

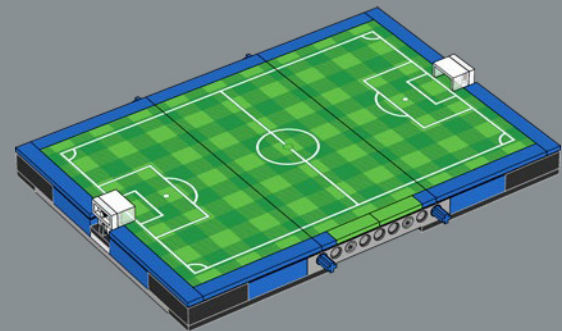

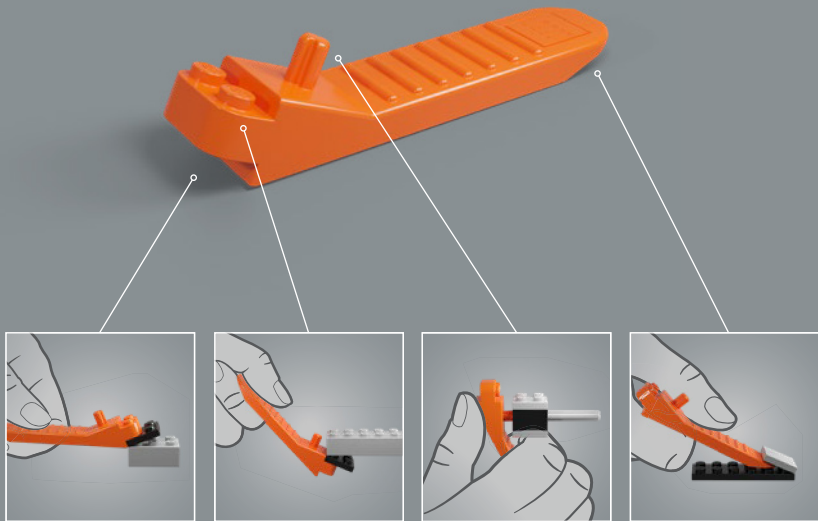

Impresiones del equipo de diseño

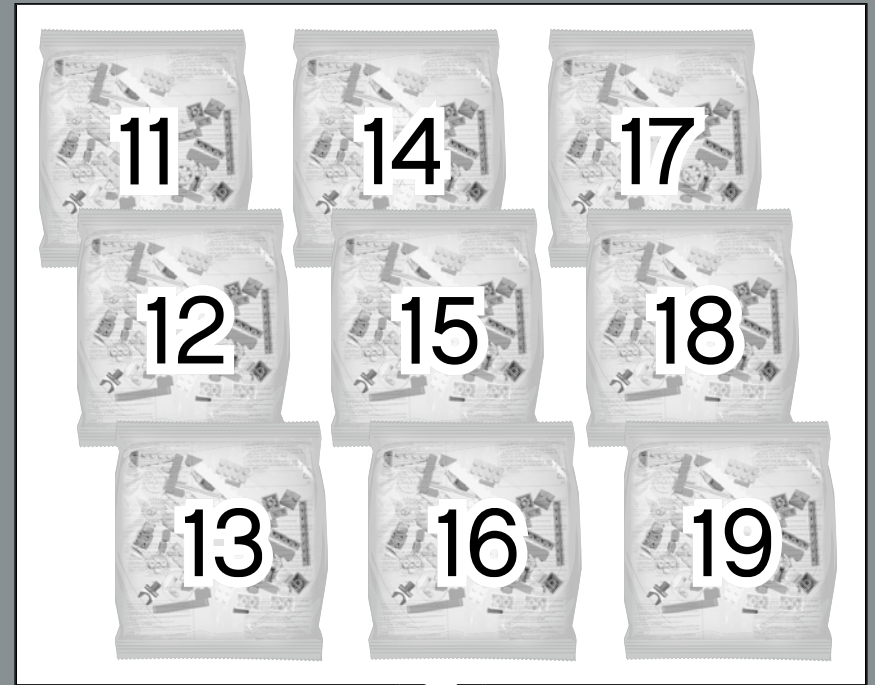

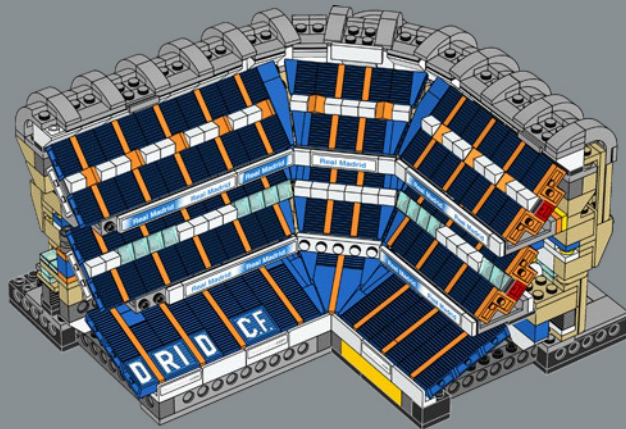

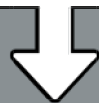

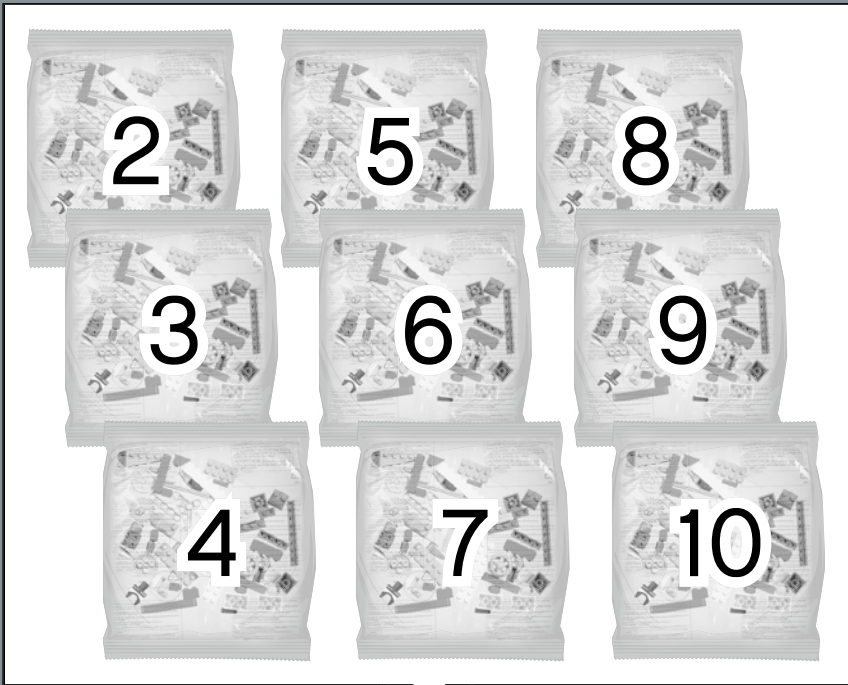

Uno de los aspectos más emocionantes de este modelo fue explorar la historia del Estadio Santiago Bernabéu. El estadio está repleto de detalles imperceptibles que datan de eras pasadas. Construir el primer nivel de gradas representa un viaje atrás en el tiempo, al estadio de la década de 1940. La galería es un eco de los años 50 y el techo data de los 80 y de la Copa

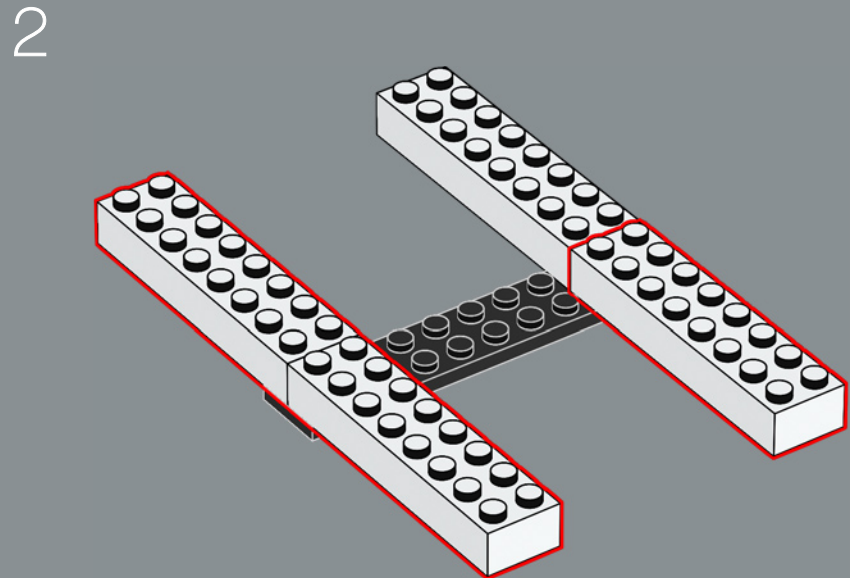

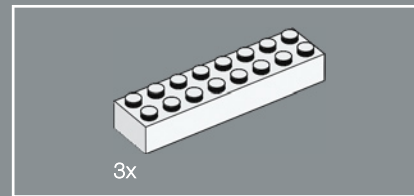

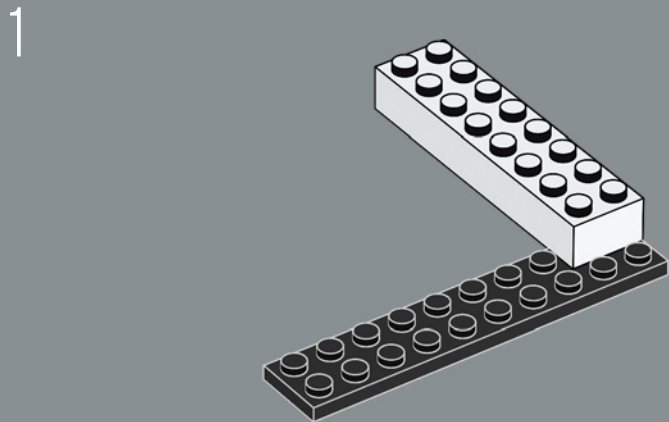

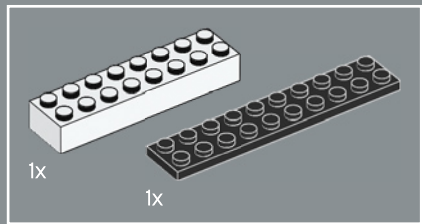

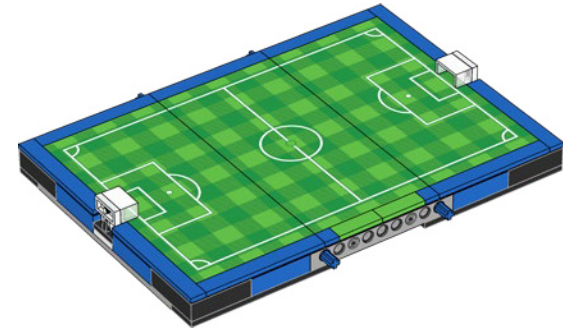

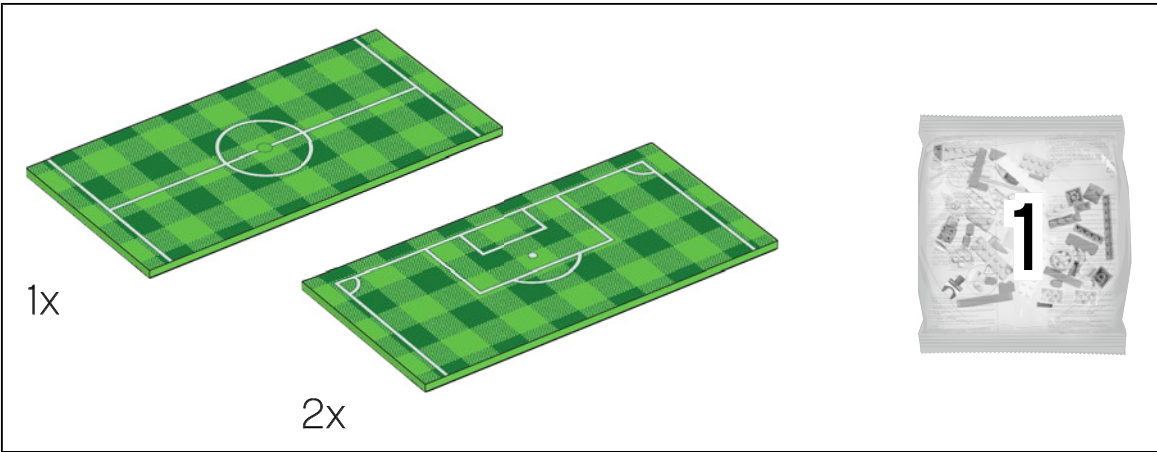

Mundial que aquí se celebró. Por todo el lugar se encuentran enterrados los recuerdos de los fanáticos, la emoción y el llanto a los que han dado lugar los encuentros disputados en esta cancha a lo largo de 75 años.
