Home of the Brick™

40366

What is LEGO House?

LEGO House is a unique experience house located at the centre of Billund – Home of the Brick™.

The building allows LEGO fans of all ages to feel the magic of the LEGO universe and have the ultimate LEGO experience all year round. A number of new LEGO experiences and 25 million LEGO bricks will greet children and adults alike, inviting them to unleash their creativity.

LEGO House includes paid attractions as well as experiences open to the public. You will not need a ticket to visit LEGO Square, play on the terraces, explore the LEGO Store and treat yourself to extraordinary culinary experiences with a LEGO twist at one of the three eateries.

5,470 kg of roaring LEGO® dinosaurs

Three giant LEGO® dinosaurs greet visitors when they climb the stairs to the Experience Zones of LEGO House.

Positioned in a white gallery – The Masterpiece Gallery – the three iconic dinosaurs are the stunning centrepieces of the room. When deciding which models to have here, many options were considered – however, one important thinking was that the model should celebrate the three different building systems within the LEGO® portfolio. And the result speaks for itself: The red dinosaur is made of LEGO DUPLO® bricks, the green one is made of LEGO System bricks while the yellow one consists of LEGO Technic elements.

All three models were developed in close collaboration with a selected group of LEGO fans several years before the Grand Opening of LEGO House in September 2017. The group came up with art directions for the LEGO designers to work further with. On the DUPLO model, the fans suggested to create life on the animal to make it playful and colourful. They also suggested the use of digger buckets for claws and turtle elements for eyes.

On the Technic model, the suggestion from the fans was to go for a modular

approach, where the panels are repeated, and they also designed the actual claws and teeth for the model.

The green LEGO System model is the one that has the most naturalistic build. Here the fans suggested to use roof and slope elements to get a naturalistic skin via SNOT building (studs not on top).

Afterwards, the models were built by hand at the modelling shop in Kladno in the Czech Republic by professional LEGO builders and finally carefully installed inside the Masterpiece Gallery before closing the floor of the room.

The Masterpiece Gallery is a celebration of the human imagination and the audacity of creation. It is a gallery dedicated to the LEGO builders of the world, featuring original works by multiple talents. In here, LEGO House pays tribute to great talents that have chosen the LEGO brick as their creative medium and spent countless hours conceptualising, designing, building and perfecting their artistic visions.

This is a tribute to all loyal LEGO fans around the world, and hopefully a great source of inspiration to everybody.

FACTS ABOUT THE THREE DINOSAURS IN LEGO® HOUSE:

Each model has a metal skeleton inside to support the LEGO® bricks. The height of each model is 2.92 m / 115 inches (without the podium).

- Bricks: 50,940 pcs.
- Brick weight: 536 kg
- Total weight: 1,997 kg
- Production time: 671 hours

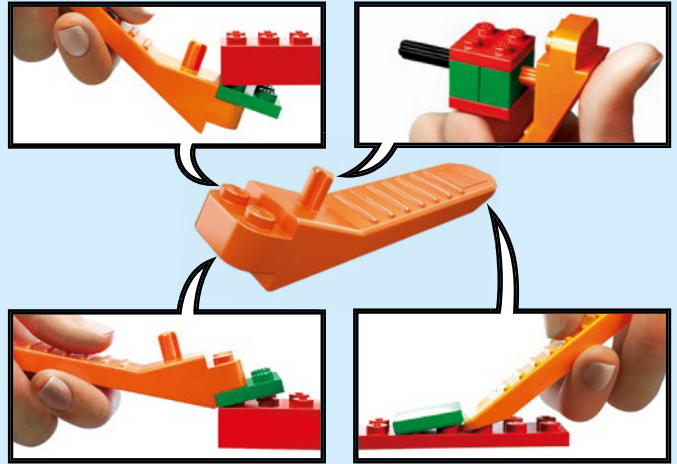

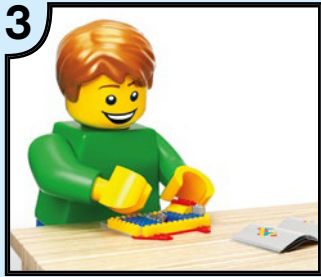

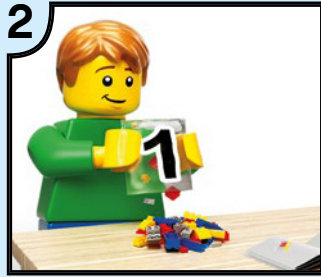

- Bricks: 253,274 pcs.
- Brick weight: 432 kg
- Total weight: 1,779 kg
- Production time: 1,372 hours

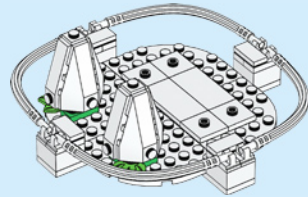

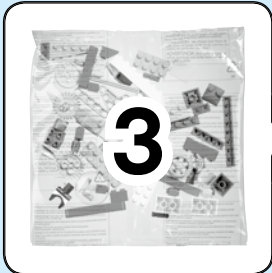

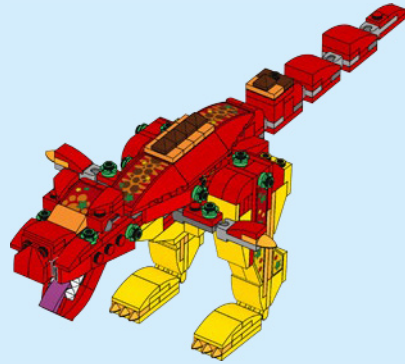

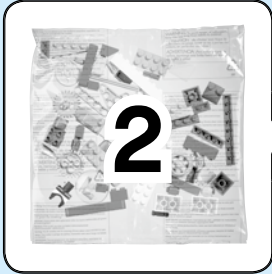

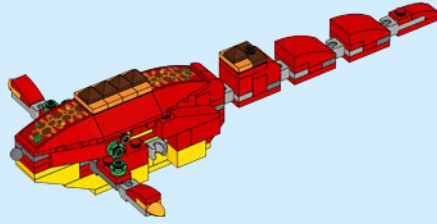

- Bricks: 298,431 pcs.
- Brick weight: 447 kg
- Total weight: 1,694 kg
- Production time: 1,002 hours
